NINETY-NINTH REPORT

of the

PUBLIC SCHOOLS

of the

STATE OF MISSOURI

School Year Ending June 30, 1948

Issued by

HUBERT WHEELER

State Commissioner of Education

Jefferson City, Missouri

6899

MID-STATE PRINTING CO., JEFFERSON CITY, MO.

LETTER OF TRANSMITTAL

State Department of Education
Division of Public Schools
Jefferson City, Missouri
January 1, 1949

Sixty-Fifth General Assembly
Jefferson City, Missouri

Gentlemen:

In compliance with Senate Bill 256, Laws of 1945, Section 8, Part 9, I have the honor to submit herewith the Ninety-Ninth Annual Report of the State Department of Education, Division of Public Schools, for the school year beginning July 1, 1947, and ending June 30, 1948.

In addition to the statistical data contained in the report, there is included a discussion of the work of the Division of Public Schools during the past year and some information concerning public higher education in Missouri.

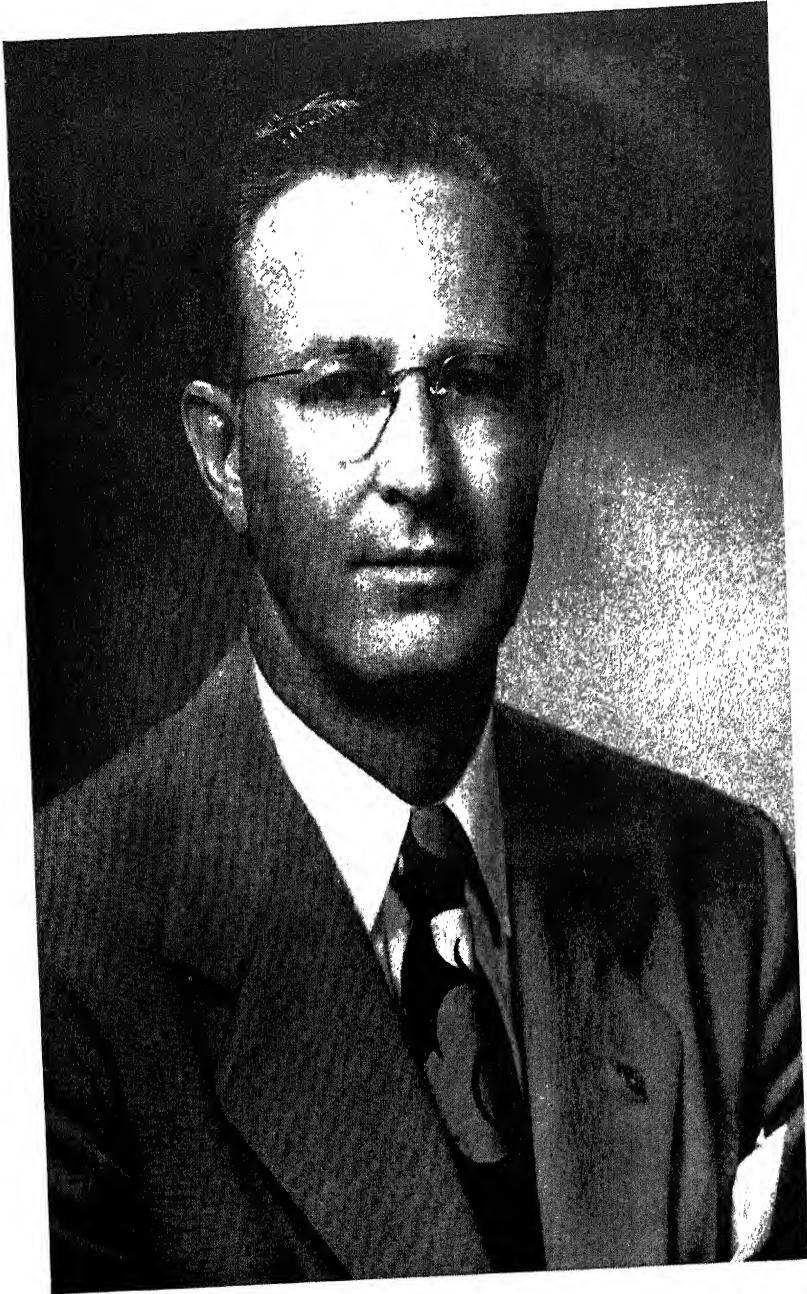

Respectfully submitted,

State Commissioner of Education.

MEMBERS STATE BOARD OF EDUCATION

<i>Name</i>	<i>Address</i>	<i>Position</i>	<i>Term Expires</i>

Ollin Drennan	Kirksville	Member	1955

COMMISSIONER HUBERT WHEELER

THE STATE BOARD OF EDUCATION

The supervision of instruction in the public schools is vested in the State Board of Education, composed of eight members.

It is the duty of the Board to appoint a Commissioner of Education, who shall serve as its chief administrative officer. Members of the professional staff are appointed on his recommendation.

Some of the other many responsibilities of the Board include:

1. The carrying out of the educational policies of the State, relating to public schools, as provided by law.
2. The investment of all moneys received by the State to be applied to the capital of any fund for educational purposes.
3. The apportionment of state school moneys to the various school districts.
4. The assembling of information that will reflect continuously the condition and management of the public schools.
5. The securing of reports from county officials and boards of education as will reflect the condition of schools and their management.
6. The publishing of laws relating to schools.
7. The providing of blanks for the reporting of information required.
8. The certification of teachers.
9. The classification of the public schools.
10. The making of an annual report to the General Assembly when in session, otherwise to the Governor.

The State Board of Education meets in Jefferson City. Official action can be taken only with a majority vote of the Board. The Board establishes policies in accordance with the law for the Division of Public Schools. To the Commissioner of Education and the members of the staff, the Board must look for the effective interpretation and implementation of these policies.

The State Board of Education is the State Board for Vocational Education.

The members of the Board receive as compensation for their services, \$10.00 for each day spent in the attendance of board meetings, and are reimbursed for necessary expenses incurred in the performance of their duties.

STATE DEPARTMENT OF EDUCATION

DIVISION OF PUBLIC SCHOOLS

(Personnel as of December 1, 1948)

Hubert Wheeler.....State Commissioner of Education
Ella Mae Flippen.....Secretary
Helen Johnson.....Receptionist

Administration

L. E. Ziegler.....Assistant Commissioner
Hazel Williams.....Secretary

School Building Services

George D. Englehart.....Director
Maurita Haley.....Secretary

School Finance

Part One

FUNCTIONS OF THE DEPARTMENT

Following the adoption of the new Constitution of Missouri and the modern trend in education, the responsibilities of the State Department of Education have been greatly increased. The work of the State Department of Education may be said in general to be of a two-fold nature; that is, it will comprise services designed (1) to improve all phases of instruction concerned with the education, health and general welfare of the learner at the respective levels and (2) to assist in effectively organizing, managing and financing the education program.

In order that the Department might best give services to the State which will aid in the improvement of instruction, the State Board of Education approved a new organization for the Department. The internal organization of the Department is set up on a functional basis. Each of three divisions, (administration, instruction and planning, vocational education) is in charge of an assistant commissioner, who is responsible to the Commissioner of Education and who directs the activities of his division.

Under each division are seven or eight sections, each headed by a director. The sections in each division deal with a closely related area of work. This plan of organization places direct responsibility and appropriate authority in the hands of the assistant commissioner and the directors, and in turn, also allows for a complete coordination of efforts of the three divisions. Since the State Department of Education has the responsibility and the obligation of providing services designed and expected to improve the program of education in the State, it, therefore, in effect is a supervisory and service organization. It is the stated policy of the State Board of Education to cooperate with all duly constituted educational organizations and agencies to the end that Missouri may achieve the best educational facilities possible.

DIVISION OF ADMINISTRATION

L. E. Ziegler, *Assistant Commissioner*

School Building Service

School plant services in Missouri are largely of an advisory nature. At the request of the local school officials assistance is given in determining building needs, in the preparation of educational specifications for new structures, in selection of adequate and desirable sites, in remodeling and reconditioning old buildings, in maintenance of existing plants and sites, in selection and installation of service systems, and in the selection and installation of instructional equipment.

It is also a function of this section to examine and approve plans and specifications on all new buildings for which the state grants building aid.

At the request of the local school district, assistance is given in setting up adequate insurance programs and revising existing programs for protection of school properties.

A program of custodial training for school janitors is directed by this section. Area schools are operated in the different sections of the state during the summer vacation period for the training of school custodians. This training emphasizes the care of school property with the view of providing the best possible physical working conditions for pupils and teachers. The responsibility of the school custodian in the safeguarding of the lives and health of the children is given special emphasis. Part of the training program is designed to give custodians assistance in providing a maintenance program for buildings and equipment with the view of extending the life and usefulness of the school plant.

District Reorganization

Senate Bill No. 308, enacted by the 64th General Assembly, provides for the creation of a section of school district reorganization within the Division of Public Schools of the State Department of Education. After the bill became effective July 18, 1948, the State Board of Education complied with the law by establishing a section of district reorganization and appointing a director to be in charge of the section. This act is given in its entirety as follows:

Section 1. The state board of education shall establish within the division of public schools of the state department of education a section of district reorganization. The state board, through said section of district reorganization, shall be advisory and upon request by any county board of education shall cooperate with the various county boards of education in making plans for the enlargement and reorganization of school districts throughout the state and shall provide such technical and advisory assistance in connection therewith as may, in the discretion of the board, promote efficiency in school administration and the improvement of educational opportunities for the school children of the state.

Since July 18, this Section has been at work assisting and advising county boards of education in the implementation of Senate Bill No. 307, also enacted by the 64th General Assembly. This Act pertains to school district reorganization and provides for the procedure and method of re-

organizing school districts into larger administrative school units. The bulletin, *Some Suggestions On A Study of Educational Facilities and Reorganization of School Districts in Missouri*, has been distributed to members of county boards of education to assist them in making a study of the present school districts. During the first three and one half months that these two laws have been in operation, the staff in the Section of Reorganization has had the pleasure of meeting and advising with 107 of the 114 county boards of education in the State. These meetings were held with individual county boards and group meetings where several county boards were present. Group meetings have been held at the following centers: Springfield State College, Warrensburg State College, Maryville State College, Kirksville Teachers College, Neosho, Chillicothe, Poplar Bluff, Potosi, Marble Hill and Washington University.

The numerous requests and inquiries for materials and information relative to reorganization from lay and professional people indicate a widespread interest for better educational opportunities resulting from larger and more satisfactory administrative units.

Finance

The Constitution of Missouri provides that not less than one fourth of the general revenue shall be set apart for the support of the public schools of the state. The General Assembly has for many years appropriated one third of the general revenue for this purpose, however.

For the school year 1947-48 the total school apportionment, as calculated in accordance with the provisions of the 1931 School Law, was \$31,576,332.09, which was sent to the approximately 8500 school districts of the state.

The amount of money paid by the state for the support of public schools for the past decade is approximately as follows:

Year	Amount	Year	Amount
1938-39.....	\$15,567,759	1943-44.....	\$24,575,023
1939-40.....	15,815,156	1944-45.....	24,611,985
1940-41.....	17,830,789	1945-46.....	26,812,658
1941-42.....	21,108,614	1946-47.....	28,871,093
1942-43.....	22,271,072	1947-48.....	32,801,027

The Section of Finance is responsible for the following duties and activities:

- (1) Apportionment of the state school funds in August, December and March of each school year to the approximately 8500 school districts.
- (2) Apportionment of vocational funds to those districts maintaining such departments.
- (3) Distribution of vocational rehabilitation funds for the training and rehabilitating of handicapped persons.
- (4) The apportionment of high school teacher-training funds to those districts providing such training.

- (5) Apportionment of city teacher training funds to those districts providing city teacher training.
- (6) Gathering of enumeration data from the various counties to be used as a basis for distribution of free textbook funds.
- (7) Distribution of building aid funds to those districts qualifying.
- (8) Distribution of the fund for the improvement of Negro education.
- (9) Distribution of school lunch funds to those districts providing such services.
- (10) Internal accounting of all funds--administrative, vocational, rehabilitation, school lunch, veterans training, school district reorganization, high school teacher training, colored children's school, appropriated for salaries, expenses, and general operation of the Department of Education.
- (11) Correspondence, interviews and opinions pertaining to school funds, financial accounting, and school laws.

Information and Publications

The Section of Information and Publications serves the State Department of Education in its attempt to interpret the program of the public schools of this State.

This section is responsible for:

1. Adequate dissemination of information concerning the activities of the various Divisions and Sections of the Department and of the public school program of the State.
2. The use of all legitimate media to keep the program of the public schools before the people of this State and to assist in the proper interpretation of this program.
3. Editing the various publications of the Department, including the monthly magazine, *Missouri Schools*.

In order to achieve its objectives, the Section of Information and Publications makes use of such means and agencies as special publicity, publications, news releases, radio, and motion pictures.

Research and Statistical Information

The function of the Section of Research and Statistical Information is to assemble, summarize, file, and disseminate educational data and information of the schools of Missouri. In addition, services are rendered to the schools of the State and other sections of the Department of Education. The statistical data for the Annual Reports of the Public Schools of the State of Missouri are assembled from reports submitted by superintendents of schools, secretaries of boards of education, county superintendents of schools, county clerks and college officials.

The Research Office is well equipped for research and statistical purposes. Included among this equipment are four I.B.M. machines, five adding machines, one calculator, typewriters and similar equipment. The I.B.M. machines used are: tabulator, sorter, key punch, and test-scoring. The financial data for the distribution of state money in August, December and March, as well as the monthly payments to schools for school lunch, are

processed on these machines. During the past year two occupational surveys have been summarized. These were the Occupational Survey of St. Francois County and the Survey of Occupational Interests for St. Louis County.

All county teachers examination papers, graded by the State Department of Education, are scored and tabulated in this office. The schools are continuing the use of the test-scoring service. However, because of the shortage of help, only those tests which can be machine graded are scored in the Research Office.

School Lunch

It is the function of this section to administer the National School Lunch program and the funds allotted to Missouri each year under the National School Lunch Act. Some of the basic principles upon which the program was developed are: (1) That every child should be given the opportunity to receive an adequate lunch at school (2) That lunch should be provided any child regardless of ability to pay and without segregation between paying and nonpaying children (3) That the school lunch should be a part of the total educational program of the school and community (The lunch room should be considered as a laboratory in which classroom teachings in health and nutrition could be put into practice.) (4) That the noon lunch is important as a learning experience for the boys and girls in the areas of health, citizenship and social living (5) That the lunch program should be operated on a non-profit basis.

During this school year, 1347 Missouri schools, with an enrollment of approximately 300,000 children, participated in this nation-wide program and received federal reimbursement amounting to \$1,342,053.33. Because of a limited national appropriation, it was necessary to decline approval of seventy-five applications after Missouri's apportionment of funds had been committed. Based on the number of inquiries received, it is estimated that 1500 Missouri schools will request participation during the next school year. This program is administered under an agreement between the State Department of Education and the U. S. Department of Agriculture, and all operations are subject to federal audit.

Special Services

This section performs those services to schools and individuals which are not included as direct functions of other sections of the department. These services are varied in nature and change from time to time. During 1947-48 they included the handling of all requests for supplies and publications (except vocational and financial accounting), as well as the distribution of new publications and supplies to county and city superintendents; the supervision of the mailing room and stock room; the keeping of current mailing lists of superintendents and other school people; the evaluation of military credit; the administration of the equivalence certificate program; the supervision of the Educational Department of the State Fair; and the supervision of the activities of the State Educational Agency for War Surplus Property.

New publications are distributed to the public schools, the private and parochial schools, the state and private colleges and the state departments of education in other states. Distribution of supplies is made to the high school districts, the 114 county superintendents, many individual teachers and others. The activities of the mailing room, in handling the mail for all sections of the Department, have increased three or fourfold in the past four years.

A number of requests for information regarding military credit are answered. Until June 30, 1948, the Section of Special Services supervised the administration of the G.E.D. testing program for veterans of World War II in order that they might secure a high school diploma through the local school. Papers were scored in the Department and results certified back to the high school for the issuance of the diploma.

This section receives applications for the Equivalence Certificate, supervises the administering of the G.E.D. tests and issues certificates to those who qualify. Any resident of the state over 21 years of age may make application for the certificate. Examinations are given in May and December of each year in nine testing centers of the State.

This section works with the State Fair Association in the preparation of the premium list for the Educational Department, the supervision and the allocation of exhibit space in the Educational Building during the Fair.

The State Department of Education has been designated by the Governor as the State Educational Agency for Surplus Property. The Section of Special Services handles the activities of this Agency. It accepts donation items of surplus property from the Army, Navy and Air Forces, upon allocation by the U. S. Office of Education, and makes equitable distribution of these items to the schools of this State without profit. All public, private and parochial schools on the elementary, secondary and college level are eligible to secure property through the State Agency. For the fifteen months ending June 30, 1948, this Agency distributed to schools, property valued at approximately \$4,500,000, at a cost to the schools of \$135,000, and assisted educational institutions of the State to secure approximately \$6,000,000 worth of real property through purchase at discounts ranging from 40 to 100 per cent.

Beginning July 1, 1948, the department library and textbook registration will become a part of this section.

DIVISION OF INSTRUCTION AND PLANNING

H. Pat Wardlaw, *Assistant Commissioner*

Curriculum

Most of the school districts in Missouri are small and are lacking in the finances, facilities and personnel to produce local courses of study as curriculum guides. Teachers generally, and beginning teachers especially, have a real need for guidance in curriculum, materials, and methods which can be made available through courses of study prepared by the State Department of Education in cooperation with other educational agencies and with local district representatives.

For this reason the State Department of Education, in cooperation with the school people of Missouri, carries on a regular program of development and publication of courses of study, bulletins, and guides and makes these publications available to the schools of the State.

Continuous and constant revision on both the secondary and elementary level and under the following headings is carried on:

1. Language Arts
2. Social Studies
3. Mathematics

4. Natural Science
5. Practical Arts
6. Fine Arts
7. Health and Physical Education

Additional supplementary bulletins and materials in more specific areas are often provided. During the past year a special bulletin was prepared to aid the teachers and administrators of the State in implementing the new law concerning the teaching of courses in the constitutions of the State of Missouri and the United States, and American history, including American institutions. By using the resources and personnel of various educational agencies in developing this material it has been possible to obtain a most excellent spirit of cooperation toward the teaching of a "Zeal for American Democracy" to the youth of Missouri.

A special bulletin concerning the teaching of plays and games in the elementary school, recently provided, has proved very beneficial, particularly to teachers in the rural schools. A bulletin on the kindergarten level is in the process of preparation. Revisions to include such areas as UNESCO, atomic energy, air-age education, and driver education in the secondary curriculum are being studied.

Special Education

It is the consensus of educators today that we must look well to the education of all American youth. We must, therefore, determine the needs of all youth. We must consider their liabilities and assets, their shortcomings, and their potentialities. An educational program must be provided not only for the so-called normal, but also for those who deviate from the normal.

In order to provide this type of education, the Sixty-Fourth General Assembly of Missouri passed Senate Committee Substitute for House Bill 126. This law provides for reimbursement on excess cost up to \$300 for orthopedically handicapped, \$250 for the deaf and hard of hearing, \$225 for the blind and partially sighted, \$100 for the mentally retarded, \$100 for the mentally deficient, and \$20 for each speech defective, provided classes are set up to handle these children.

State School for the Blind

Missouri's School for the Blind is located at 3815 Magnolia Avenue, St. Louis, Missouri. This school has been serving blind children of Missouri for ninety-five years. It offers substantially the same program given in the regular public schools, except that embossed books that can be read with the finger tips are used instead of inkprint. This embossed notation is known as Braille. Taxpayers are so firmly convinced that every blind child needs a public school education that they make this school free to all children needing it. Children with vision of 20/200 or less in the better eye, after correction, may attend if they are between the ages of five and twenty-one years.

State School for the Deaf

The Missouri School for the Deaf, located in Fulton, Missouri, is a school for children whose hearing is so defective they are unable to make normal progress in the regular public schools. The most modern methods of teaching are employed. In an effort to use even the least amount of

hearing a child may have, modern equipment in electrical hearing aids is provided. This school is what is commonly known as a "combined school." More than one method is employed. The technique which is best suited to the pupil is used. Every child is given an opportunity to learn through the oral method; that is, through speech and lip reading. In addition to this, wherever there is residual hearing, it is trained through the use of mechanical hearing aids. The institution is supported financially by state school funds, and for that reason no charge is made to residents of the State of Missouri for either board or tuition.

Supervision

The section of school supervision is charged with the responsibility of supervising, classifying, and accrediting the public elementary and secondary schools of the state. The personnel of this section includes a director and ten field supervisors, five elementary and five secondary. Supervisors work in pairs to a great extent, one elementary and one secondary person being assigned to each teachers college area.

Each elementary supervisor works closely with the county superintendents of schools in his area in the matter of improving educational opportunities in the rural schools. Each secondary supervisor works closely with both the city and county superintendents of schools in matters of supervision, classification and accreditation.

Supervisors, acting through the county superintendent's office, also aid in teachers meetings, workshops and conferences and provide consultant service to boards of education, administrators, teachers, and lay groups.

During the past year the tentative plan of classification of all schools, rural and urban, was completed. The coming year is intended as a period of orientation in which local school districts will plan and initiate improvements leading toward attainable classifications. The desired goal is to have all schools classified as A Class, AA Class or AAA Class for the purpose of proper description of their educational programs and for the purpose of encouraging constant growth and improvement.

Teacher Education and Certification

Most of the teachers in the public schools of Missouri receive their certificates from the State Department of Education, Division of Public Schools, Section of Teacher Education and Certification. The task of issuing and renewing thousands of certificates each year is enormous, and when the work incident to teacher education is considered, in addition to the work involved in certification, it is readily observed that this section is a busy one throughout the entire year.

All certificates are now issued by the State Department of Education, with two exceptions; the state teacher-education institutions issue life certificates to persons who complete the requirements for the degree of Bachelor of Science in Education, and county superintendents of schools may issue third-grade county certificates upon the basis of regular and special examinations. However, practically all county superintendents have their third-grade certificates issued by the State Department, and graded elementary certificate renewals are also handled by the Department.

One-year, two-year, five-year, and permanent elementary certificates are issued upon the basis of college credits, as are one-year, five-year, and permanent secondary certificates. The graded elementary certificates, which are issued upon the basis of teachers' examinations, are of the one-

year, two-year, and three-year types, depending upon the examination average. The examinations are prepared by the section on Teacher Education and Certification, and the examinations are administered by the county superintendents. The papers are returned to the State Department for machine scoring.

Special administrative certificates are issued to superintendents and principals who have earned the master's degree and have made special preparation for their particular administrative jobs.

The number of one-year elementary and secondary certificates now being issued is quite large. The one-year certificate may be considered sub-standard since the holder has not met all the requirements for regular certification. It is hoped that the number of such certificates may be reduced significantly within the next two to three years.

The Director of Teacher Education and Certification works closely with all the colleges of the State which offer teacher education programs. Studies looking toward improvements in teacher education and in certification procedures are under way at the present time.

A tremendous task of supplying an adequate number of appropriately trained teachers for the public schools of Missouri faces us, since the enrollments in elementary and secondary schools are expected to increase greatly within the next six to eight years. This indicates the need for a dynamic program of selective recruitment and an increased emphasis on teacher education. It should in no sense mean a lowering of the standards of teacher preparation.

Fine Arts Education

The service area in fine arts education promotes a coordinating program in music and art education in the elementary and secondary schools. Aware of the necessity of an educational structure's having a strong foundation, emphasis is placed on the fine arts subjects on the elementary level. County fine arts supervision is encouraged and promoted for the rural elementary schools. Those counties unable to secure the services of a specially trained person for this work are assisted in planning group meetings for in-service training.

Clinics are co-sponsored with the various colleges to include vocal and instrumental demonstrations emphasizing methods and materials especially applicable to developing high school bands, orchestras and glee clubs. Co-operative enterprises with secondary art groups are planned for the promotion of the art program on that level.

Working with state-wide college committees, a study is being made for developing standards of certifications and the improvement of the pre-service and in-service training for teachers of fine arts.

In cooperation with the University of Missouri Committee on Accredited Schools and Colleges and the Executive Council of the Missouri Music Teachers Association, a program of applied music study, done under approved private teachers, is administered and supervised.

Serving in an advisory and coordinating capacity, this service area works closely with the Missouri Music Educators Association, the Missouri Arts Teachers Association and various state and national organizations in the study of the problems related to fine arts education and in the organization of means for the promotion of cultural interests on a state-wide basis.

Health and Physical Education

Supervisory services in the field of health and physical education cover such areas as health education, safety, driver education and training, public school recreation, and physical education. These services are provided for all public elementary and secondary schools of the state. More specifically, the services offered in this group may be listed as follows:

1. Provision of consultant service in the development of courses of study and teacher guides.
2. Provision of information relating to state and national trends and new developments.
3. The organization of state, county, and local conferences, workshops, and institutes for the training of teachers and the dissemination of knowledge concerning health practices and conditions.
4. Advice and service to local school districts in the improvement of school health facilities.
5. Cooperation with other state and local agencies interested in the general improvement of health services and conditions throughout the state.

One of the newer programs under the supervision of this area is the program of driver education and training. During the past school year nearly 100 high school districts offered courses in this field. Plans call for the expansion of this training program during the next two or three years and indications are that this expansion can readily be accomplished. The supervisor in charge of this area of service has provided valuable materials and consultant service to the section of curriculum which will be used in the development of improved courses of study, resource units, and teaching guides in the field of health and physical education. The goal for this supervisory area is the provision of better health instruction services and materials and better physical education and recreation opportunities throughout the public elementary and secondary schools of the State.

Industrial Arts

Industrial arts is that part of general education that involves a study of the tools, materials, processes and problems of an industrial civilization. Its purpose is to help the student understand this complex industrial world and to prepare him in some measure for living in it. The student who takes a well organized and properly taught course in an industrial arts subject should better understand and appreciate our American industry and its problems. He should be a more intelligent consumer of its products. He should have an increased appreciation of craftsmanship and design and should be better equipped to select his life's work. He should also have command of some of the basic skills in some phase of industry, and should be able to express himself creatively, using some of the materials of industry. As a result of his experiences he should develop more desirable social relationships.

Industrial arts, like any curriculum area, must undergo change, revision, and growth if it is to serve its function in a changing world. Certain significant changes and revisions have been taking place in the State which have stimulated healthful growth of the program. There has been a definite trend toward the general shop type of organization. This plan provides for the composite general shop as a basis or beginning course, which

consists of several activities from a variety of industrial areas, carried on in a single shop under one teacher. After completion of this basic course, students may, according to interest and abilities, enroll in such courses as general woodwork, general metalwork, general drafting, and applied electricity. These courses may be taught either in the general shop or in a shop set up especially for that purpose.

Another change which has been taking place gradually is the definite improvement of the physical facilities. New buildings have been built and excellent provisions made for the industrial arts subjects. Many schools of the state have undergone a rather thorough revision of their industrial arts programs. Better lighting has been provided, walls and equipment have been painted in attractive color schemes, new standards of shop housekeeping have been maintained, modern methods of tool storage have been installed, and modern and efficient tools and equipment have been added.

There has been a trend to broaden and enrich course content, particularly by the use of more and better instructional materials. The teachers of the State, with the cooperation of the State Department of Education, have been engaged in the production of comprehensive courses of study in several areas of the industrial arts. The course of study in applied electricity will be put into use early in the 1948-49 school year. Courses in general shop, general metalwork, general woodwork, and general drafting will soon follow.

Not only has there been progress in the nature and quality of industrial arts programs, but the number of people served by the program has shown steady growth. There were in Missouri in 1947-48, approximately 330 teachers of industrial arts subjects providing instruction for more than 19,000 high school pupils and more than half as many elementary pupils.

Negro Education

Negro representation was instituted in the supervisory staff of the State Department of Education in 1921. This was done in order to attempt to improve both the instruction and the facilities and equipment for instructing the Negro children in the public schools of Missouri. The results have seemed obvious and far-reaching especially during the past eight years. Schools for Negro children have been greatly improved in the areas of curriculum, equipment, sanitary toilet facilities, building facilities, guidance, and health services.

Other specific accomplishments since the enactment of the New Constitution may be listed as follows:

1. Higher standards in teacher qualifications.
2. Higher salaries for all teachers.
3. Increased teacher education opportunities through expansion of the Inter-Session Summer School carried on jointly by the State Department of Education and Lincoln University for the improvement of teachers in Negro schools in the southeast section of the state.
4. Greater cooperation with the supervisory staff of the State Department of Education in all areas affecting the welfare and the education of Negro children.

The enrollment of Negro children in the public schools is constantly increasing. Many and peculiar problems are yet to be solved but it is evident that improvement through increased supervision is being made. Two other important programs are now under way which should improve conditions greatly. They are the reorganization of school districts and the reclassification and accreditation of schools.

DIVISION OF VOCATIONAL EDUCATION

Tracy E. Dale, *Assistant Commissioner*

Agricultural Education

One hundred ninety schools offered courses in vocational agriculture during the past year, and twenty new departments have been approved for the coming year. Enrollment in vocational agriculture classes increased from 8223 to 9227.

The different phases of the vocational agriculture program are organized into four specific fields: All-Day Program (including the F.F.A.), Adult Farmer classes, Young Farmer classes, and Veterans' Training.

The All-Day program continues to be the major responsibility of the vocational agriculture instructor. Students completed 11,074 projects, representing a labor income of \$1,794,429.36. The average income per productive projects was \$162.03, or an increase of \$33 over the average income per boy which reached a new high of \$267. The number of improvement projects and supplementary farm practices increased over the previous year to 21,460 and 28,227, respectively.

Students of vocational agriculture continued to be the chief exhibitors at many of our local, district, and state fairs. District F.F.A. shows, sponsored by the State Department of Agriculture, have been of great value in improving the quality of livestock produced by the F.F.A. members.

The winning teams in state judging contests represented Missouri in the national judging contests. Osceola was awarded a gold emblem in poultry judging; Butler was awarded a gold emblem in dairy judging, the meats judging and identification team from Bowling Green was awarded a gold emblem; Tipton and Salisbury earned honorable mention certificates in dairy products and livestock judging. National awards are made on the gold emblem, silver emblem, bronze emblem, and honorable mention bases instead of ranking the teams numerically.

The veterans' training program, known as Institutional On-Farm Training, has become one of the major undertakings of the vocational agriculture departments in the State of Missouri. At the present time, nearly one hundred per cent of our vocational agriculture departments are sponsoring this program. Some of the schools have as many as 187 veterans in training. At the present time there are approximately 14,000 veterans in training. Our Public schools have employed 625 special instructors, known as Itinerant Vocational Agriculture Instructors, to conduct this training program. This program is directed by the local school administrator and the vocational agriculture teacher. A pre-training course for teachers of veterans' classes has been set up at the University of Missouri.

A number of meetings have been held, and others planned, in cooperation with the University Extension Service, to instruct these teachers in the balanced farming program.

One hundred ninety-seven Adult Farmer classes were conducted. The total number of persons enrolled in this program was 7,844. Twenty-three Young Farmer classes were held, with an enrollment of 496.

The Future Farmers of America is an inter-curricular activity of vocational agriculture. Members learn, through active participation, how to conduct and take part in public meetings, to buy and sell cooperatively, to solve their own problems, finance themselves, and to assume other civic responsibility. The foundation upon which the F.F.A. organization is built includes leadership and character development, sportsmanship, cooperation, service, thrift, scholarship, improved agriculture, organized recreation, and citizenship. The average membership of the F.F.A. for last year was 103%. The membership over 100% includes the graduates who are maintaining their active membership. The Missouri Association awarded 172 State Farmer degrees at the State Convention in Columbia. Eight American Farmer degrees were awarded Missouri boys at the National F.F.A. Convention in Kansas City.

Six hundred eighty boys and their instructors from 104 schools were in attendance at the fourth Annual F.F.A. Leadership Training Camp, Lake of the Ozarks, from June 21 to August 21.

Vocational Agriculture instructors traveled 1,215,855.6 miles in making visits to All-Day, Young Farmer, and Adult Farmer students. They responded to 7,325 calls for services and held 3,447 Future Farmer meetings during the year.

Distributive Education

Education for distribution provides training for those engaged in occupation which are in the selling phases of business. This commercial exchange may pertain to commodities, products, services, or ideas.

The addition of distributive education, made possible by the George-Deen Act of 1937, completed the cycle of vocational occupational education. The gap between producer and consumer can be bridged by specialized training in distribution. Raw products education through agricultural training, production and processing through trade and industrial education, and consumer education through home economics, were authorized by the Smith-Hughes Act of 1917.

All services have as one of their purposes the development of happy, useful citizens. Distributive education provides vocational training supplemented to the daily employment of those engaged in distributive occupations to aid them in developing maximum efficiency and economy of distribution; it prepares the individual for advancement to positions of greater responsibility through increased knowledge, skill and judgment; it develops workers who can serve the public efficiently, effectively and economically.

Classes in distributive education usually are adult classes held other than during the working hours of the employee, or they are part-time occupational education classes for those intent on "learning a business" and who can leave their work a part of each day to receive instruction. Instructors must be technically, professionally and occupationally competent in their fields.

These three types of instruction are given each trainee in the part-time occupational education program:

Vocational (This means specific instruction for his particular job.)

Related (General instruction concerning the broad field in which his job is found.)

Laboratory-on-the-job (actual practice under supervision of a business leader in the chosen field, assisted by the teacher-coordinator who teaches the trainee in school, is given.)

There were 108 adult classes in 21 different communities, using 70 teachers in 982 class meetings; training was given to 3,537 distributive workers during the year.

"Your Missouri Host" is the newest course added to the adult program. This is a tourist information and courtesy training course. Representatives of 24 organizations formed an advisory committee which studied the needs in Missouri and requested this training.

"Distributive Education Clubs of Missouri," our official state organization, is affiliated with the National Distributive Education Clubs. Our group served as host to the national convention held in St. Louis this year. Distributive education clubs are an integral part of the work of each coordinator in the program.

Guidance Services

The Guidance Services Section (formerly known as Occupational Information and Guidance Services) was established March 1, 1940, for the general purpose of assisting local schools to develop or improve guidance programs for pupils. Prior to July, 1947, this service operated as a consultation service for school administrators and teachers who desired assistance in developing or improving one or more phases of the school's guidance program.

The 79th Congress of the United States enacted Public Law 586 (George-Barden Act) which provides for the use of Federal vocational education funds in establishing guidance programs in local schools in addition to state programs of supervision. Consequently, local programs for counseling and supervision of guidance programs were established in Missouri for the 1947-48 school year on an experimental basis. These programs operated in the school systems at Bonne Terre, Columbia, Lamar, St. Louis and St. Joseph. During the school year 1948-49 similar programs will be operating at Cape Girardeau, Columbia, Desloge, Farmington, Independence, Jennings, Lamar, Liberty, Normandy, Riverview Gardens, Rolla, St. Joseph and St. Louis.

The State Plan for Vocational Education establishes conditions under which such local programs may be reimbursed from federal and state funds. Certain specific duties are prescribed in the plan for reimbursed counselors, to the end that such programs may serve the needs of pupils enrolled in the schools concerned.

The George-Barden Act also provides funds for the training of counselors and teachers who will work in guidance programs of local schools. A counselor trainer has been employed by the College of Education, University of Missouri, to carry out the important function of training such teachers and counselors. The counselor trainer is currently conducting in-service training programs in eighteen schools throughout the State.

A further provision of the George-Barden Act enables the Guidance Services Section to employ Federal funds for research needed for evaluation and improvement of guidance services for pupils in the public schools of the state.

Two major research problems are now being conducted: (1) An investigation into the efficiency of counseling is being carried on in eleven schools and (2) an investigation into the selection of students for trade training is being carried on in six trade schools.

The closely related functions of supervision, counseling, and research should contribute materially in the future to the development of effective guidance programs in local schools.

The major functions of the Guidance Services Section are:

- (1) To assist administrators and teachers to develop, maintain, and evaluate local guidance programs.
- (2) To prepare or assemble and pass on to local schools needed information about job opportunities and requirements for high school pupils.
- (3) To assist schools to secure and arrange in libraries materials about educational and occupational opportunities for youth.
- (4) To encourage and promote the training of vocational counselors through state institutions of higher learning and through training courses in the local school taught by the Director of Guidance Services.
- (5) To encourage closer relationships between business and industry and the schools for the purpose of aiding school-leavers to secure jobs.
- (6) To issue Counselor Certificates to candidates who meet the requirements for such certificates.

Home Economics Education

Emphasis in the vocational program in home economics is placed on the growth and development of the individual. Teachers are urged to study the needs and interests of the pupils as a basis for developing a functional program. Community contacts and home visits enable the teacher to know the specific needs of her students as a basis for program planning.

As a girl progresses with her work in home economics, she selects for further work certain problems on which she feels she needs help. These projects, which are related to the work that is being done in the classroom, provide an opportunity for the girl to make practical application of her home economics training. During the 1947-48 school year, 41,677 home projects in many areas were completed. The vocational teachers made 13,506 visits to the homes to acquaint themselves with home conditions and to supervise the projects which the girls were doing. Of this number 8200 were completed during the summer. The month of extended employment required of all vocational home economics teachers provides an opportunity for them to give further assistance with home project work and has contributed to upgrading homes in the community.

During the 1947-48 school year a vocational program was maintained in 217 departments with a total of 219 teachers. Nine new departments were approved for the year. A total of 12,041 high school girls and 254 boys were enrolled in the classes.

One hundred and fourteen teachers held classes in homemaking for adults and out-of-school youth during the 1947-48 school year. Classes of ten to fifteen lessons were presented in many areas of homemaking, which the homemakers felt were needed. A total of 359 units were presented in 163 centers reaching 12,543 men and women during the 1947-48 school year. The number of adults reached through organized classes has increased steadily each year.

The National Organization of Future Homemakers of America and the New Homemakers of America have become an integral part of the home economics program in many schools. The Missouri Associations have had a phenomenal growth, enrolling a membership of 7338 in 175 chapters of Future Homemakers and 391 in 14 chapters of New Homemakers during the 1947-48 school year. The varied chapter activities which have been carried on during the past year indicate that emphasis is being placed on worthy home membership and betterment of the community.

In-service training of teachers has been a point of emphasis in the state program for home economics education. Helps have been extended through a yearly state conference, newsletters, and visits by the state supervisory staff. In an attempt to organize the program for more effective preparation of home economics teachers, staff members of the colleges and universities have worked cooperatively with the Department during the past few years.

Industrial Education

Vocational-industrial education is that phase of industrial education dealing with specific training in the various occupations. Vocational courses are organized for youth in high school and for adults already working in the industrial field.

During 1947-48, over 3300 adults were enrolled in evening classes throughout the state for the purpose of better preparing themselves for their daily employment. Usually these classes meet for one or two evenings each week for a two-hour period. The course of study in a given subject may consist of a single short unit, or a series of short units, organized to meet the needs of the workers in the occupation.

The day trade program is offered as a part of the high school program to students who plan to enter the skilled trade, for which the training is offered, on an advanced basis as learners or apprentices. Classes are organized on a half-day basis and meet a minimum of 15 hours each week for shop instruction.

The adult industrial education program sponsored by the State Department of Education was established October 1, 1947, and is designed to expand educational opportunities through the public schools of Missouri so that mature students may secure desirable training by means of well adapted instruction in schools close to their homes. Classes under the adult industrial education program have grown rapidly and are accommodating a large number of World War II veterans over the state who desire training to prepare them for satisfactory entrance into a trade. Classes are organized on a 30-hour a week basis and include instruction in related technical information and shop practice.

Another type of vocational-industrial education carried on extensively in Missouri is the part-time cooperative program in diversified occupations. Commonly called the D.O. program, forty-one cities and towns throughout Missouri conducted educational programs of this nature during the school year 1947-48 enrolling over 1,900 students. Boys and girls of high school

age are employed out-half day on the job and attend school the other half day. A local coordinator is employed to supervise the training program of the part-time student both in school and on the job. High school credit is given for the organized work on the job and the related instruction in school.

Other part-time classes have been organized for the purpose of furnishing related training to apprentices in the various trades. Over 2,900 individuals were enrolled in courses offering instruction in trade mathematics, drafting, blueprint reading, and, in some cases, actual shop practice. Many of these classes are held on Saturday mornings.

Separate conferences were conducted during the year for high school co-ordinators and day trade teachers, and for REA foremen. The latter conference was in addition to the regular safety and job training program sponsored by the State Department of Education and serving the rural electric cooperatives of Missouri.

Advisory committees made up of equal representation of labor and industry are very helpful to all schools conducting trade and industrial programs. In this way, the school is better able to offer the type of training needed by the local community.

Vocational Rehabilitation

Vocational rehabilitation is a service comparable to Public Health, Public Welfare, and Public Education, whereby the vocationally handicapped individual is helped to the best vocational adjustment that he is capable of making. "Vocational Handicap" defined means any disability that would cause the individual to deviate from the normal in choosing his vocation or in doing the job. The prime objective of vocational rehabilitation is to make the vocationally handicapped individuals employable.

To be eligible for such services the individual must be 16 years of age; must be a resident of the State; his disability must constitute a vocational handicap; the prognosis should indicate that the services to be rendered will give him at least a 50-50 chance for successful rehabilitation; if physical restoration is indicated, the individual must be medically indigent before he is eligible for hospitalization, and/or surgery, plus treatment to remediate or to remove the disability. Services are not available for acute illnesses, and the condition created by the disability must be of a static nature. Services available through the State Department of Education, Section of Vocational Rehabilitation, in compliance with the above eligibility factors are as follows:

Medical Examinations: Without charge to the individual for the purpose of determining eligibility and feasibility, plus the limitations of work factors created by the disability.

Guidance and Counseling: Without charge to the individual for the purpose of determining the facts relative to previous employment, vocational interests, educational background, abilities, social and economic environment, which aid in formulating a rehabilitation plan.

Physical Restoration: For the purpose of remediating or removing any physical or mental condition which constitutes a vocational handicap by medical, surgical, psychiatric, or other necessary treatment. To be eligible for these services the individual must be medically indigent.

Vocational Training: For clients who need to acquire certain manual or academic skills to fit themselves for the chosen job objective. All training cost, including tuition, books, supplies, and transportation, may be available from Vocational Rehabilitation funds.

Artificial Appliances: For the purpose of making the individual employable, or for maintaining his present job. Vocational Rehabilitation participates financially in the purchase of appliances only if the client is unable to meet the cost from his own resources.

Maintenance: For the purpose of aiding the disabled person to pursue a training or physical restoration program, but who has no funds for room and board available from other sources.

Placement: For the purpose of finding satisfactory employment for every disabled person accepted for service.

Placement Equipment: May be provided from Vocational Rehabilitation funds based upon the need of the individual and upon the necessity for same for carrying out the job objective.

Statistical information will be found on page 178.

Veterans' Education

Public Law 346, commonly known as the "G.I. Bill of Rights" enacted in 1944, provides for the education and training of veterans of World War II. This law gives the various states the responsibility of approving educational institutions and business establishments to give this training.

Veterans' education may be divided into four distinct classifications, namely, (1) institutional training (colleges, universities, secondary schools, and private schools) (2) apprenticeship training (carpenters, bricklayers, and other similar job classifications that require a normal training period of more than two years) (3) other on-the-job training (embalmers, grocery store managers, and other job classifications that normally take two years or less) and (4) institutional on-the-farm training (combination of institutional training and on-the-job training).

As of June 30, 1948, there were approximately 18,000 business establishments offering apprenticeship and other on-the-job training in Missouri. Approximately 300 private schools were giving instruction to veterans of World War II (this includes eighty-two flight schools). Over 200 high schools in Missouri were offering institutional on-the-farm training to farm veterans.

At the present time the Veterans' Education Section is composed of a professional staff of 26 men, who inspect and supervise business establishments and private schools. Supervision of regularly accredited institutions is done by regular staff members of the Department of Education.

The following publications of the Department of Education are used as guides in inspecting and supervising veterans training institutions: (1) Flight Manual (2) Private School Manual and (3) On-the-Job Training Manual.

Part Two

STATISTICAL REPORT*

Part two of the Ninety-Ninth Annual Report of the Public Schools presents statistical information concerning the public school system of Missouri. The more important information included in the statistical tables is briefly summarized. More detailed information is given in the following tables. These data are for the school year beginning July 1, 1947 and ending June 30, 1948.

The total annual receipts and balances were \$137,049,148; the disbursements were \$97,135,158; and the balances June 30, 1948 were \$39,913,990 for all the school districts in the state. These receipts and balances include tuition and transportation from other schools. Amount received for tuition was \$2,423,986; amount received for transportation was \$1,130,036 or a total of \$3,554,022. The receipts and disbursements each should be reduced by this amount. These balances, exclusive of the City of St. Louis were: Teachers fund, \$15,849,410; incidental fund, \$5,217,277; textbook fund, \$600,949; building fund, \$11,252,416; sinking fund, \$2,927,852; and interest fund, \$1,652,763. The balance for the City of St. Louis was \$2,413,323.

Receipts during the 1947-48 school year increased over the 1946-47 school year in all funds except the sinking and interest funds. The balances, June 30, 1948, showed an increase over the balances, June 30, 1947, in all funds except the interest fund. The total balance, June 30, 1948, of \$39,913,990 shows an increase of \$5,613,006 over the balance the year previous. This balance should be considered as an operating balance. In school districts maintaining high schools, most teachers are paid on a 12 month basis. In these districts approximately one-fourth of the payroll will be during July, August, and September. The cost of maintenance occurs, as well as the purchase of supplies during the summer months. During these months, there are no large sources of revenue.

These increases in balances can be explained in two ways. First, a number of school districts own government bonds. This year \$3,310,299 of these bonds were counted as balances for the first time but were not included last year although they were assets at that time. Second, the school districts in the state received \$3,223,531 in the liquidation of county and township funds. The sum of these two items exceeds the increase in balances by over \$900,000.

*Data in Part II were assembled from reports from the County Superintendents, County Clerks, Secretary of Boards of Education, State School Supervisors, and other records in the office of the State Department of Education.

The source of school money is as follows:

Source	Amount	Per cent
State funds.....	\$34,356,099	35.5
County and township funds.....	6,997,038	7.2
Local taxes.....	47,110,765	48.7
Other receipts.....	\$11,805,100	
Less tuition and transportation from other districts.....	3,554,022	8.6
Totals.....	\$96,714,980	100.0

Where the current dollar comes from and where it goes, in districts maintaining high schools, is shown graphically on page 39.

The assessed valuation in Missouri for the 1947-48 period was \$3,-628,547,817. The average tax levy for high school districts was 179 cents and the average tax levy for the rural schools was 66 cents. The amount of local taxes collected was \$47,110,765.

The lists of high schools are shown on page 156 to 172. Of the 748 high schools in Missouri, 694 were first class; 5 were second class; 30 were third class and 19 were unclassified. Of the 5,669 rural schools operating in Missouri, 1,221 met standards for approval by the State Department of Education. The average high school enrollment in Missouri was 194.4.

Of the 629,878 pupils enrolled in Missouri public schools, 137,829 were in the rural schools; 21,279 were in kindergartens; 319,232 were in elementary schools; 145,417 were in high schools and 6,121 were in junior colleges. Of the 145,417 high school pupils 45,988 were non-resident. The enrollment trends since 1927 are shown graphically on page 41.

The number of school children transported to school continues to increase. There were 124,278 pupils transported a distance of two miles or more. Of this number transported 51,872 were resident elementary school pupils; 13,709 were resident high school pupils; 17,487 were non-resident elementary school pupils (no transportation reimbursement was paid by state) and 41,210 were non-resident high school pupils. Of the 6,634 that were transported a distance of less than 2 miles (largely resident) 4,751 were elementary school pupils, and 1,883 were high school pupils. The total number transported in Missouri for 1947-48 was 130,912.

The number of teachers in Missouri has varied but little since 1946-47. The number of rural teachers was 6,784; elementary school teachers 10,191; high school teachers 6,390; junior college teachers 267; and superintendents of schools 663; for a total number of 24,295 teachers. Of the 10,191 elementary school teachers, 206 were elementary school principals and 72 were supervisors. Of the 6,390 high school teachers, 142 were principals and 23 were supervisors. The average salary of these teachers was: Rural \$1,273; elementary school \$2,272; high school \$2,700; and superintendents of schools \$3,340. The salary trends for 5 years is shown on page 43.

For the 1947-48 school year, the average number of college semester hours for the elementary school teacher was 47.1 for rural teachers; 115.9 for elementary teachers in districts maintaining high schools, or an average in all elementary schools of 88.4 hours. The average number of college semester hours of the high school teacher was 143.8; and of the superintendents of schools 166.1.

By classification, the high school teacher had an average preparation of 145.5 college semester hours in first class schools; 152.4 in second class schools; 126.1 in third class schools and 134.6 in unclassified schools.

The median tenure of the Missouri public school teacher was 2.8 years. The median tenure of the rural school teacher was 2.4; the elementary school teacher 5.2 and the high school teacher 5.2.

COST PER PUPIL IN AVERAGE DAILY ATTENDANCE*

Year	Current	Debt service and capital outlay	Total
1942-43	\$93.44	\$15.32	\$108.76
1943-44	103.55	13.35	116.00
1944-45	112.90	15.57	128.47
1945-46	120.48	15.65	136.13
1946-47	136.21	24.05	160.26
1947-48	150.97	23.43	174.40
Increase or Decrease—1947-48 over 1946-47	\$14.76	\$— .62	\$14.14

*To find the "Current" per pupil cost, add the expenditures for general control, instruction, auxiliary agencies, coordinate activities, operation of plant, maintenance of plant and fixed charges in high school districts with the teachers, incidental and textbook funds of the rural school districts. From the sum of the above, subtract \$3,554,022, which is transportation and tuition paid by one school district to another, and divide this remainder by the total average daily attendance of all public schools in the state. To find the per pupil cost for "Debt Service and Capital Outlay" add the debt service and capital outlay of the high school district to the building, sinking and interest funds of the rural school districts and divide by the total average daily attendance.

The most common rural teacher in Missouri for the 1947-48 school year was a woman with 47.1 college semester hours of training; 6 years of teaching experience with 2.4 years in present position; she was paid a salary of \$1,273. Of the 6,784 rural teachers 70 per cent had a county teachers certificate and 11.4 per cent had an emergency certificate. The average enrollment per teacher was 20.3 with an average daily attendance of 16.5 pupils.

The most common elementary teacher in Missouri again was a woman with 115.9 college semester hours of training; 14.8 years of teaching experience and 5.2 years in her present position. She was paid an annual salary

of \$2,272. Of the 10,191 elementary teachers 90.7 per cent had a state or state school certificate, while 12.4 per cent had an emergency certificate. The average enrollment per teacher was 31 with an average daily attendance of 26.7 pupils.

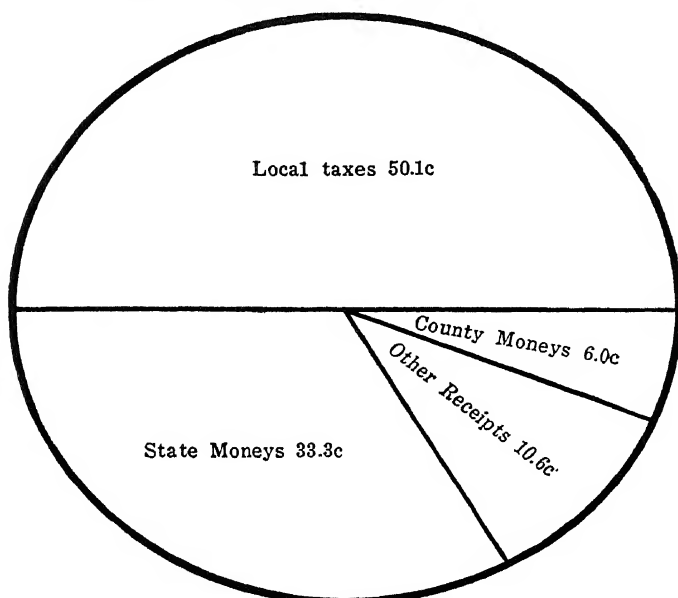

The most common high school teacher also was a woman with 143.8 college semester hours of training; 14.7 years of experience and 5.2 years in her present position. The annual salary was \$2,700. Of the 6,390 high school teachers, 97 per cent had a state or state school certificate, while 10 per cent had an emergency certificate. The average enrollment per teacher was 23 with an average daily attendance of 21.3 pupils.

The most common superintendent of schools was a man with 166.1 college semester hours of training with a Masters Degree; 20.4 years teaching experience and has been in his present position 3.8 years. He was paid an annual salary of \$3,340.

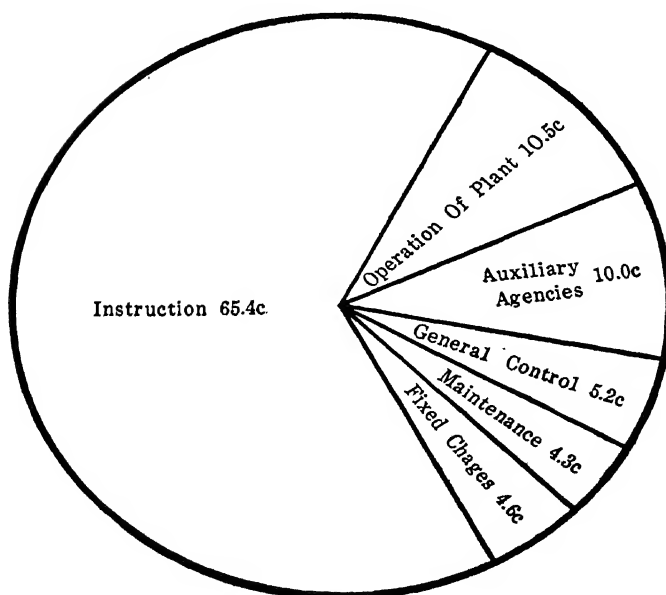

The current cost per pupil in average daily attendance in the public schools of Missouri for the 1947-48 school year was \$150.97. A comparison of the 1947-48 school year with each of the five preceding school years on the per pupil current cost, the per pupil cost for debt service and capital outlay and the total per pupil cost is shown in the preceeding table.

1947-48	21	70	108	3,141
				3,537

D. DATA ON SPECIAL FIELDS

1. VOCATIONAL REHABILITATION

TABLE I

REHABILITATION INVESTMENT AND RETURNS FOR FISCAL YEAR 1947-48

Rehabilitated 1947-48:		
Male	749	
Female	232	
Total		981
Per capita cost		\$242.53
Average annual earnings before rehabilitation		332.60
Average annual earnings after rehabilitation		1,409.21
Average increase in annual earnings		1,076.61
Aggregate of increase in annual earnings		1,056,154.41
Annual returns on earnings from 2% sales tax		21,123.09
Returns from earnings for 20 years life expectancy		422,461.80
Total amount expended for rehabilitants, all sources		237,920.02
Net gain to the state in financial returns on investment		184,541.78
Per cent of profit on rehabilitation investment		77.66

1. Annual earnings based on beginning salary. Does not take into consideration the increase in earnings as a result of experience.
2. Assuming that 2% sales tax is paid on entire salary, but no other form of tax considered.
3. Assuming average life expectancy is twenty years. Average age at rehabilitation is 32, and the average life expectancy in Missouri for normal person is 65.

TABLE II

DISBURSEMENTS OF REHABILITATION FUNDS FOR THE FISCAL YEAR
JULY 1, 1947 TO JUNE 30, 1948

Administration	\$23,765.49
Guidance and placement	167,670.03
Medical examinations	21,321.61
Psychiatric examinations	1,035.16
Medical treatment	1,891.59
Psychiatric treatment	370.00
Surgical treatment	11,540.00
Dental treatment	1,726.50
Artificial limbs	32,830.52
Braces	2,866.56
Hearing aids	8,161.35
Glasses	808.62
Surgical appliances	438.90
Repairs to appliances	385.62
Hospitalization	21,971.52
Convalescent home care	722.50
Physical and occupational therapy	1,419.00
Nursing care (in client's residence)	
Transportation—medical	190.03
Maintenance—medical	171.38
Training—educational institution	65,676.49
Training—employment	10,549.26
Training—correspondence	490.80
Training—tutorial	88.00
Training—materials	14,116.35
Training—maintenance	62,577.40
Training—transportation	2,299.23
Customary occupational tools and equipment	17,228.83
Occupational licenses	62.00
Other	4,397.02
Total	\$476,771.76

TABLE III

VOCATIONAL REHABILITATION

Summary of Receipts and Expenditures During the Year 1947-48:

A. RECEIPTS AND EXPENDITURES OF FEDERAL MONEY	
1. Balance of Federal Funds in State Treasury, July 1, 1947	\$2,786.26
2. Receipts of Federal Funds During the Year	365,141.98
Total of Balance and Receipt (1 Plus 2)	\$367,928.24
Expenditures of Federal Funds for Rehabilitation Services	311,854.86
5. Unexpired Balance of Federal Funds in State Treasury, June 30, 1948	\$56,073.38
b. EXPENDITURES OF STATE AND LOCAL FUNDS	
Expenditures from State Funds	\$164,916.90
Expenditures from Local Funds	
8. Total Expenditures from State and Local Funds	\$164,916.90
9. Grand Total Expenditures, Federal, State, Local (4 Plus 6 Plus 7)	476,771.76
